## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This application has been examined. This application continuation-in-part (C-I-P) of serial number 10/026,002, filed December 21, 2001, now patent number 6, 696,961 issued February 24, 2004. Claims 1-15 are pending.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Drinkwater. See figure 13 and the disclosure in column 6, lines 33+ in which a utility system main supply valved by a valve 1301 includes an occupancy sensor 1307 and a main utility sensor 1308 or 1309 to provide an actuation signal from a processor to "...move said controlled shut-off device toward said closed position..." Responsive to input from the utility sensor 1308 or 1309 and the motion sensor "...indicates occurrence of an abnormal event." (i.e., break in water distribution system). The utility is water. (claim 14).

#### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art

Art Unit: 3753

to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claims 6-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Figure 13 of Drinkwater in view of Figure 5 of Hoch, Jr. et al. Drinkwater discloses the claimed invention except for the recitation of sensors in a plurality of designated areas as taught by 72, 74, 76, 78 of Hoch, Jr. et al. See column 4, lines 37+. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system of Drinkwater to include sensors disposed in designated areas as taught by Hoch, Jr. et al in order to provide more effective utility monitoring. An alarm system is disclosed in column 8, lines 10+ (claim 12). A temperature sensor 32 is shown (Figure 1)(claim 13).

#### *Allowable Subject Matter*

7. Claim 15 is allowed.
